Managers know only one constant, and that is unpredictability. This is especially true in libraries, where managers are called upon to manage volunteers, student interns, librarians, paraprofessionals, and more. Then throw in different viewpoints from different generations and levels of technology, a flow of patrons that can change from one day to the next, tightening budgets, public relations, staff changes, and that's just the beginning. This wide-ranging anthology deals effectively with the unique challenges of library management from a variety of perspectives and experiences. A must-have sourcebook for the well-seasoned or the brand-new library manager.

From internal staff management to grant and project management, this collection serves as an excellent guide for the new and experienced manager and offers insight into a variety of situations faced by those who oversee projects, people, facilities, and more. Heather Zabriskie Assistant Manager, Technical Services Orange County Library System Orlando, Florida

Management encompasses every facet of library life. This book interprets management broadly and is designed for library employees at every level. The tips are both practical and implementable.

Excellent book! Refer to it often!
