The Collection Program in School  
Kay Bishop 2013  
One of my goals in all of my youth services classes is to offer course content that is relevant to both school and public librarians. I really enjoyed looking through The Collection Program in School and to see such practical topics covered throughout. One of the recurring requests from students is to give them course content that they can use on the job and I think that this text offers just that. I teach Children's Programming and Services and I believe that if school librarians as well as public librarians are to be effective in providing quality programming and services to their populations they not only need to understand how to implement programs but also know about how their collections support effective programming as well as services to the community. I am indeed fortunate to have students who see immediate connections between school and public librarians and this text brings into clear focus not only what is needed to develop quality collections in the school environment but also to show public librarians how they can support the school collections. The benefit in the collaboration of the school and the

public library are invaluable to the children in any community. I also found that this edition includes current and up-to-date information such as the inclusion of all types of materials in a collection including digital resources and a very understandable section on Core Curriculum.
