Customer Reviews

Well, Mas Ayoob has done it once again, a superbly researched and well written book on the use of deadly force in a self-defense situation. This book is loaded with lots of very sound and well research information and provides you with a library of recommended reading material that you should also study. Great Stuff!The following is a list of the chapters in this book and a brief synopsis

of what each chapter entails. Chapter 1: Introduction In this section the author gives you a standard introduction on what to expect in this book. A couple of things in particular stood out to me in this section, and the following section, and that was the recommendation of one book entitled, "A Time To Kill" by Greg Hopkins, and a set of four legal books entitled, "Warren On Homicide." I ordered the first book off of , and am actively searching for the four legal books, which at the time of this review I have not been able to find. But persistence and the internet will locate them for me in short order, I hope! Chapter 2: Standards In this section, the author talks about the "legal standards" by which YOU will be judged if you are ever involved in a situation where you employed deadly force. Each states or jurisdictions laws, although they may be similar, are going to be slightly different from one jurisdiction to another, it behooves you to know and follow the laws of the jurisdiction that you are in. Ignorance of the law is NOT a viable defense. Chapter 3: The Ability Factor In this section, the author discusses the "ability" of your attacker to inflict grievous bodily harm or death upon you.
