The Poetry Of Nursing: Poems And Commentaries Of Leading Nurse-Poets (Literature And Medicine)

Synopsis

A gathering of coregiver's voices. So much has been written about literature and medicine from the perspective of physicians. But in the last few years, nurses are finding their voices and began making important contributions to the field of biomedical humanities. These men and women medical professionals see different things and experience patients and health care issues in different contexts. Judy Schaefer has compiled this anthology of contemporary nurse-poets' work, which is accompanied by their commentaries about - their poetry, their work, and their lives. She has gathered contributions from some of the best-known nurse-poets as well as from those who deserve to be. The Poetry of Nursing will add significantly to the ever-growing body of literature that connects medicine and the humanities.

Book Information

Customer Reviews

This book approaches nurses' writing from a new angle. Not only are the nurses' poems presented, but alongside each poem is a commentary on the circumstances of the writing of the poem: in other words, the poetic process behind the finished product. It's a mistake to label these writers "nurse-poets," suggesting that they are somehow separate from "poets." They are poets who are also working as nurses, just as there are poets who are working as butchers and teachers and undertakers and housewives. The poets' commentaries in this collection reveal hints and information about the process of writing that will be valuable to all writers, not only those who

happen to be nurses. Some readers may fear that "nurses' poetry" might be either too sweet or too grim. But this is a collection of human poetry, good poetry, poetry that stays in the mind and the heart.

As a retired nurse, I especially enjoyed the thoughts shared in such a lovely form.
