## Customer Reviews

You don't have to be a Veterinarian to understand this great book written for people like us with a desire to help our dearest dogs friends. to observe them closely day to day and know if they have heart problems soon to help them with proper medical veterinary attention.

A really great guide for veterinarians and veterinary students alike. I bought this during my senior year because I liked it so much when I was working in cardiology.

There is a lot of information and it is great for any extra stuff you need to study, but it was not as helpful as I thought it would be for my cardiology class.

Very practical and brief book. Strongly recommended for all interested.
