Customer Reviews

When I purchased this book, i was pretty skeptical because I had not really ever bought anything on .com, but when I did. I received great service, fast shipping, and great prices. This book came to me just like new. Really! It look like i had bought it out of a bookstore but 3x less the price. So I am an absolute .com fan and love to shop here because of my experience with this purchase.

Thanks.-Denise, Commerce, TX

Its a text book that was required for 2 graduate level classes and it wasnt the best book. Parts are hard to understand and arnt detailed enough to be able to complete a study.

I was very pleased with my purchase. The description said it was in good condition. It was actually in great condition as though it had just came out of the plastic.

The book was just as described and was shipped quickly. The binding and pages looked great! Very happy with the purchase!!
